

Cellule animale

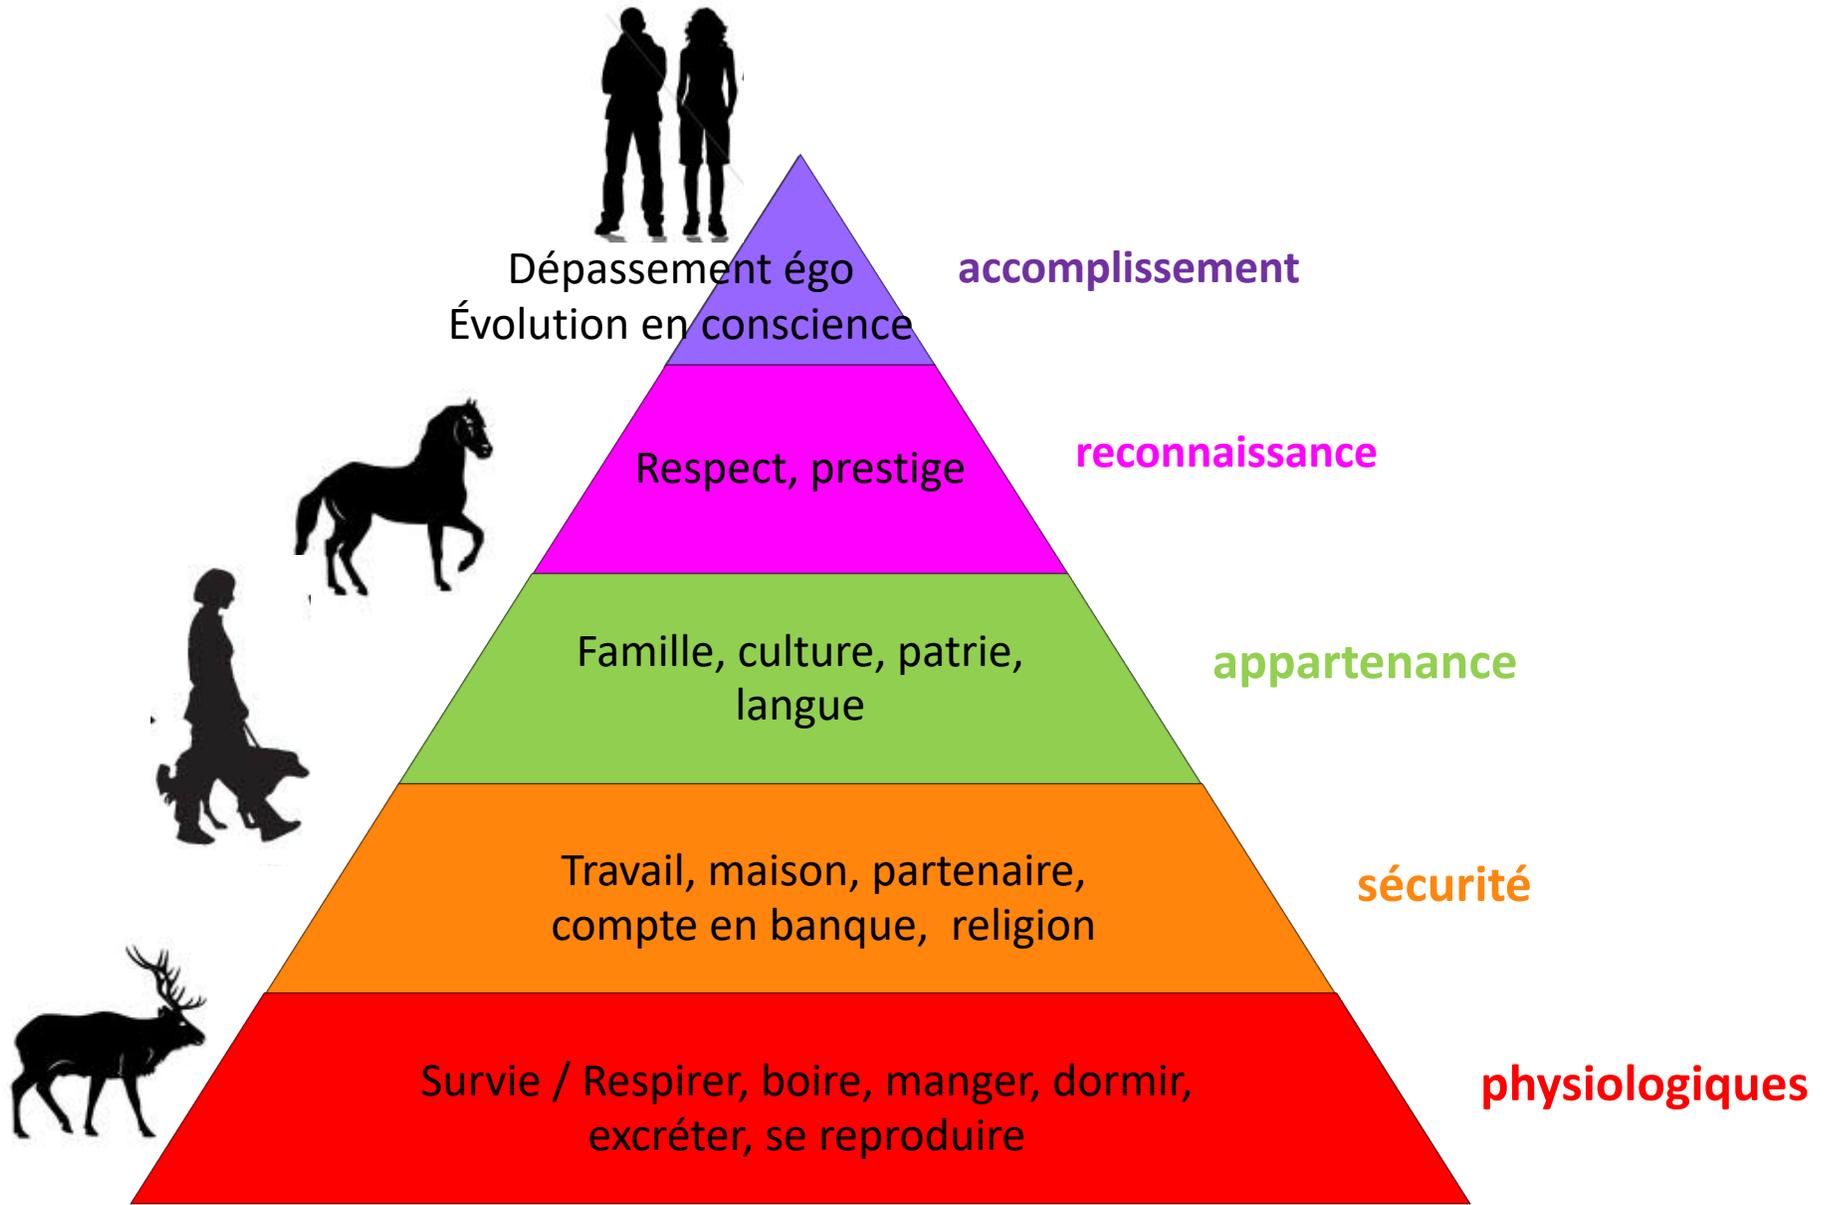

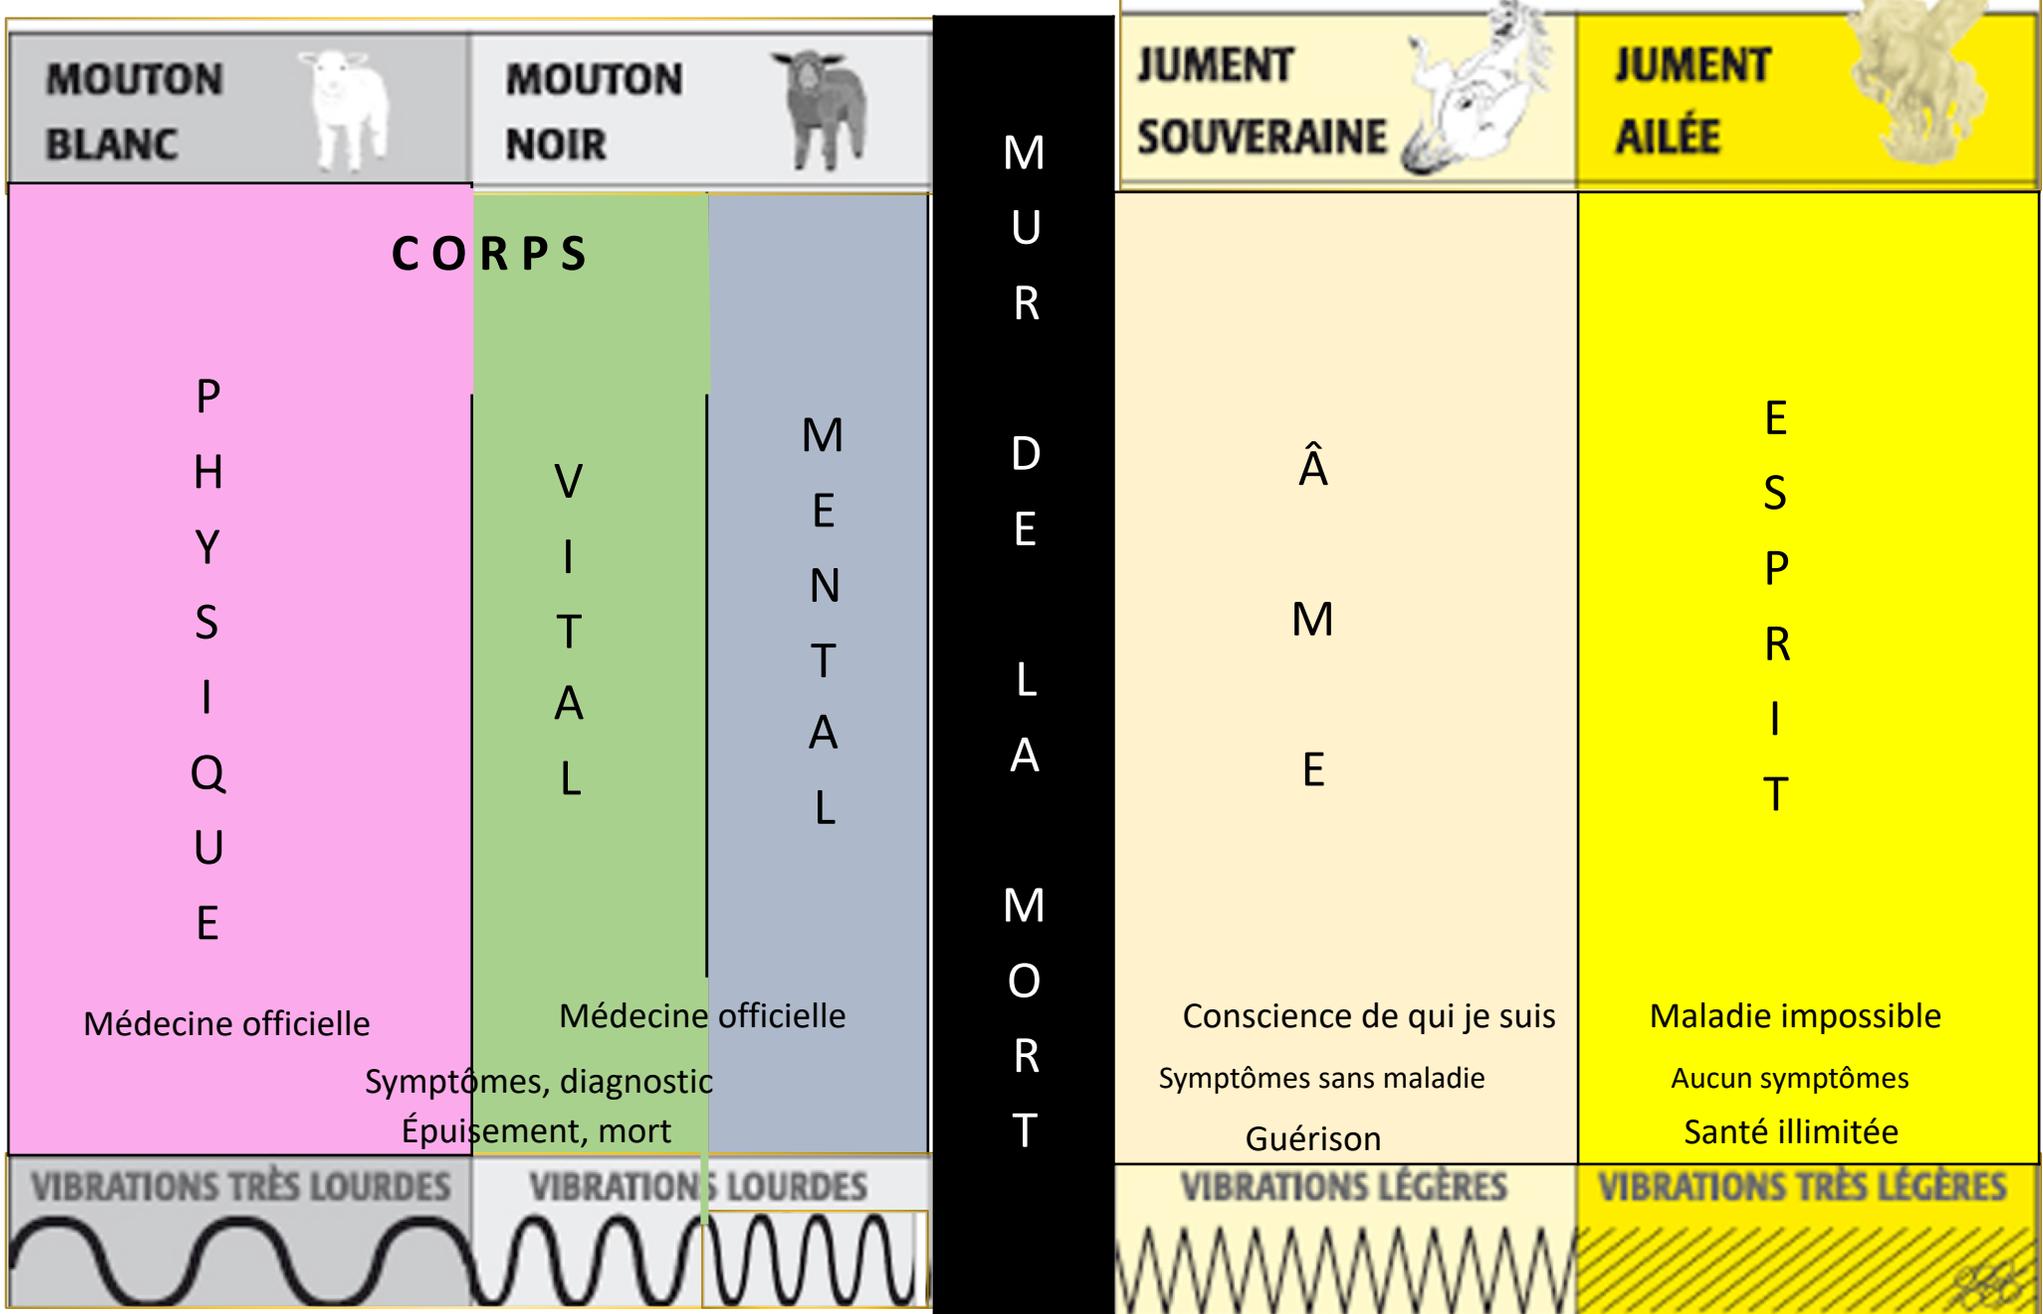

Cellule végétale

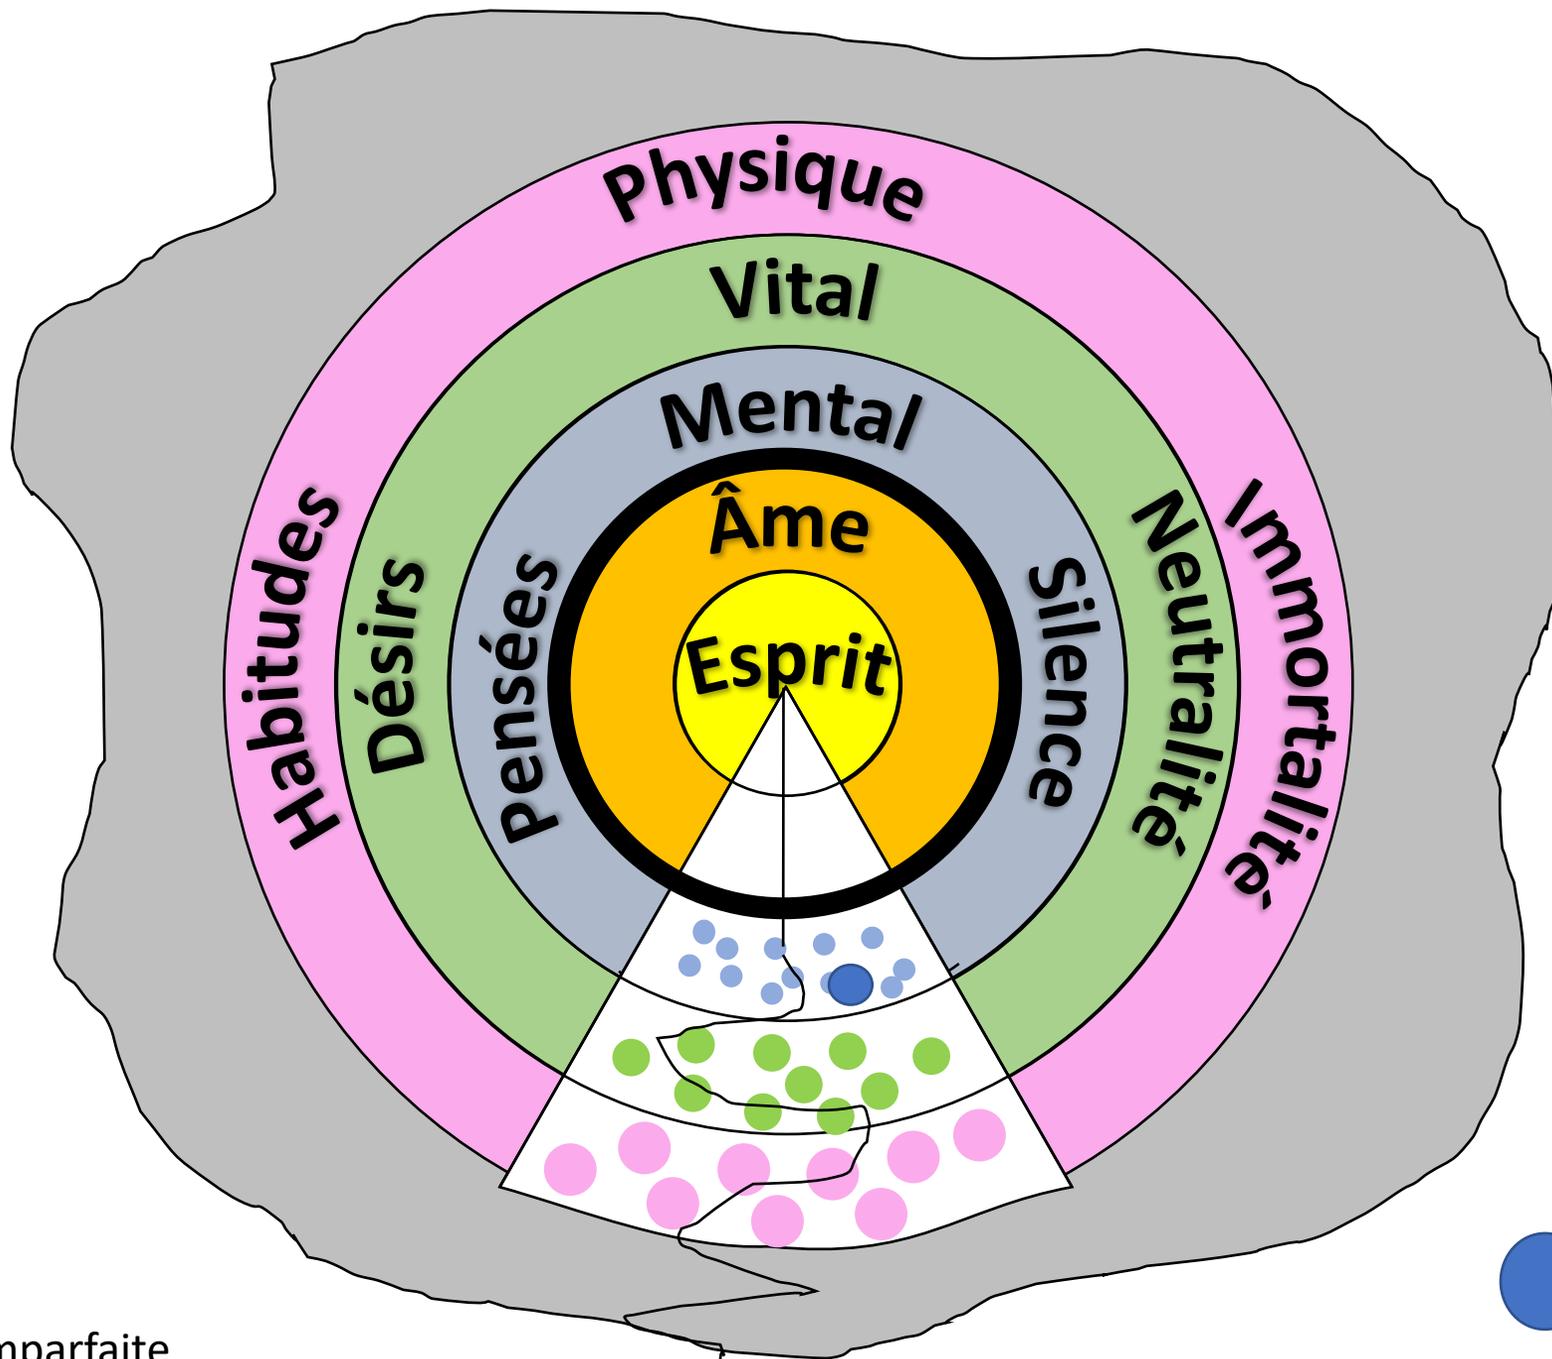

- Communication /télépathie /informations chimiques
  - Fabrication enzymes / zymases
  - Connaissance fusionner les atomes / obtention de substances
- faisant défaut
- Construction : micro-organismes
  - Bâtisseurs : cellules
  - Oeuvrage : le tout et les éléments du tout
  - Pacifiques, constructeurs, immortels

**Plus petite unité vivante**

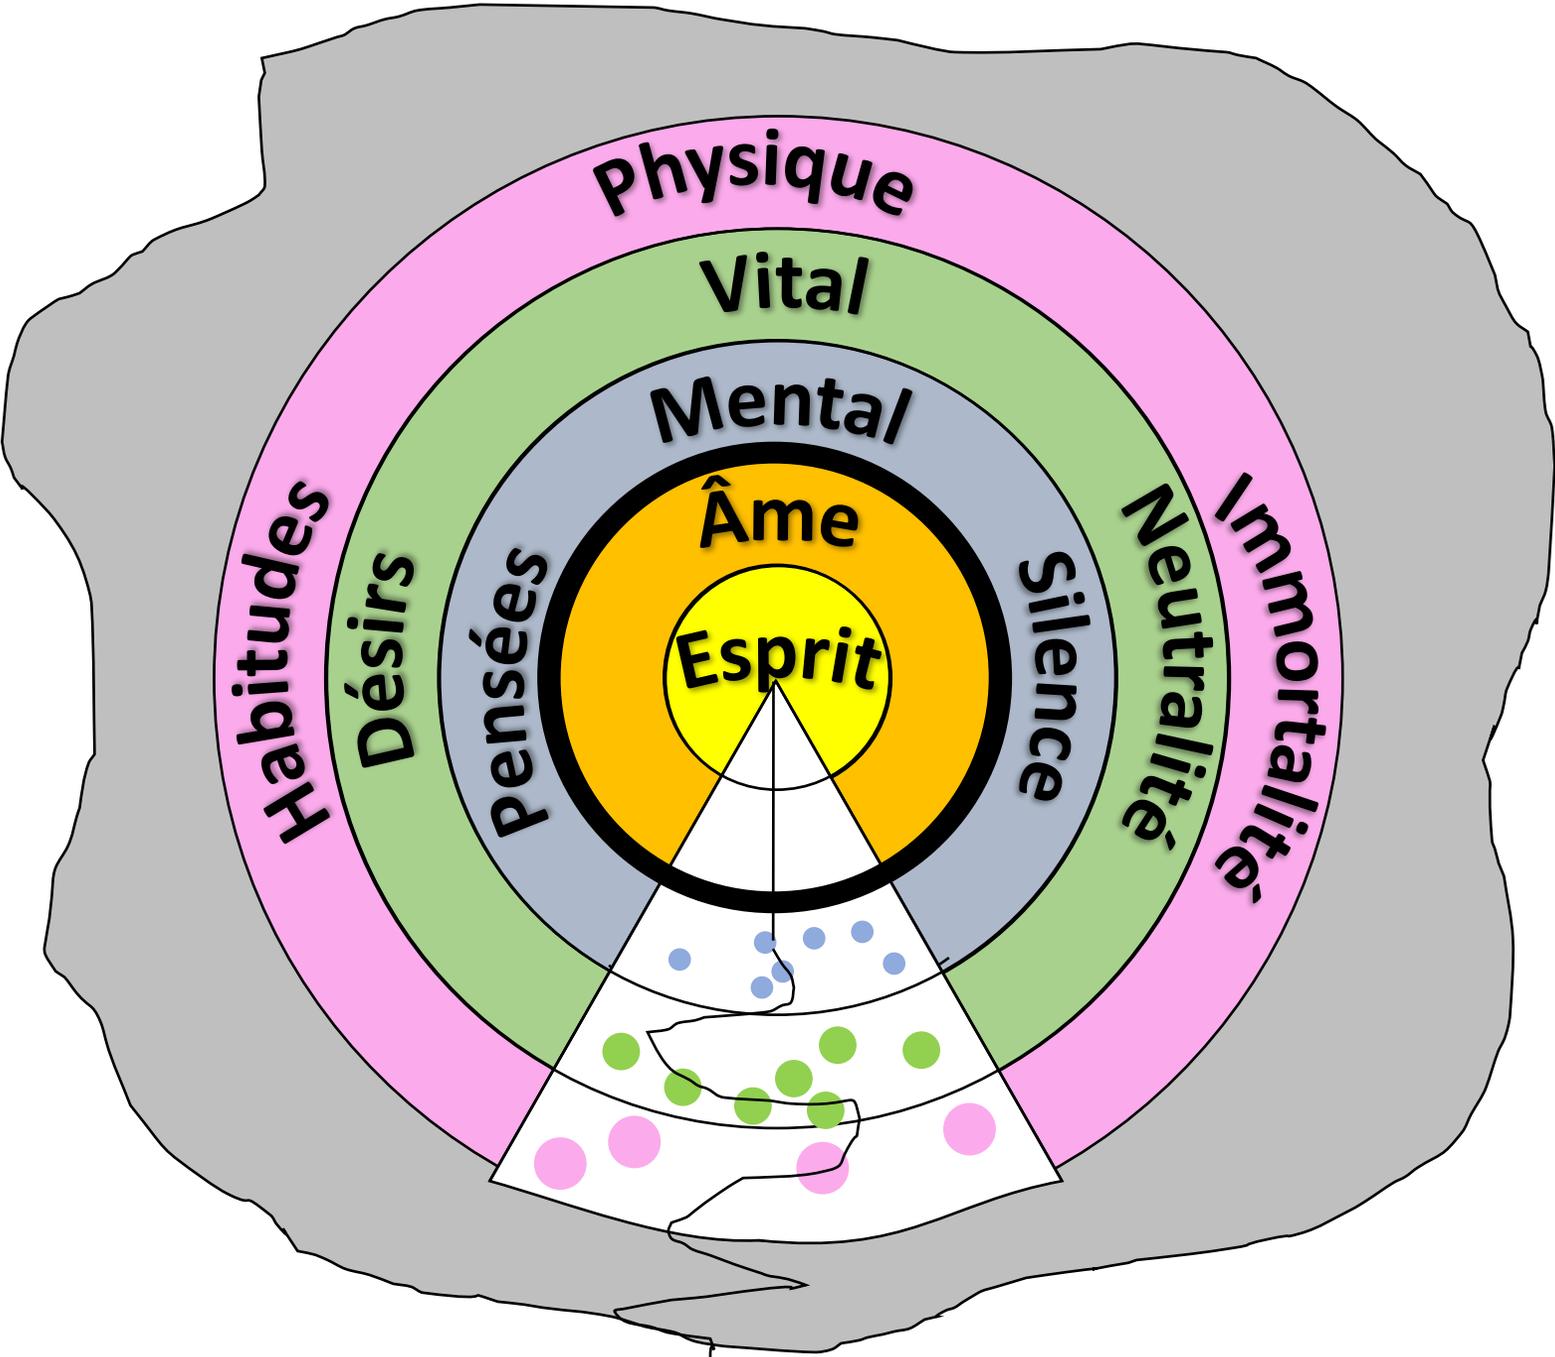

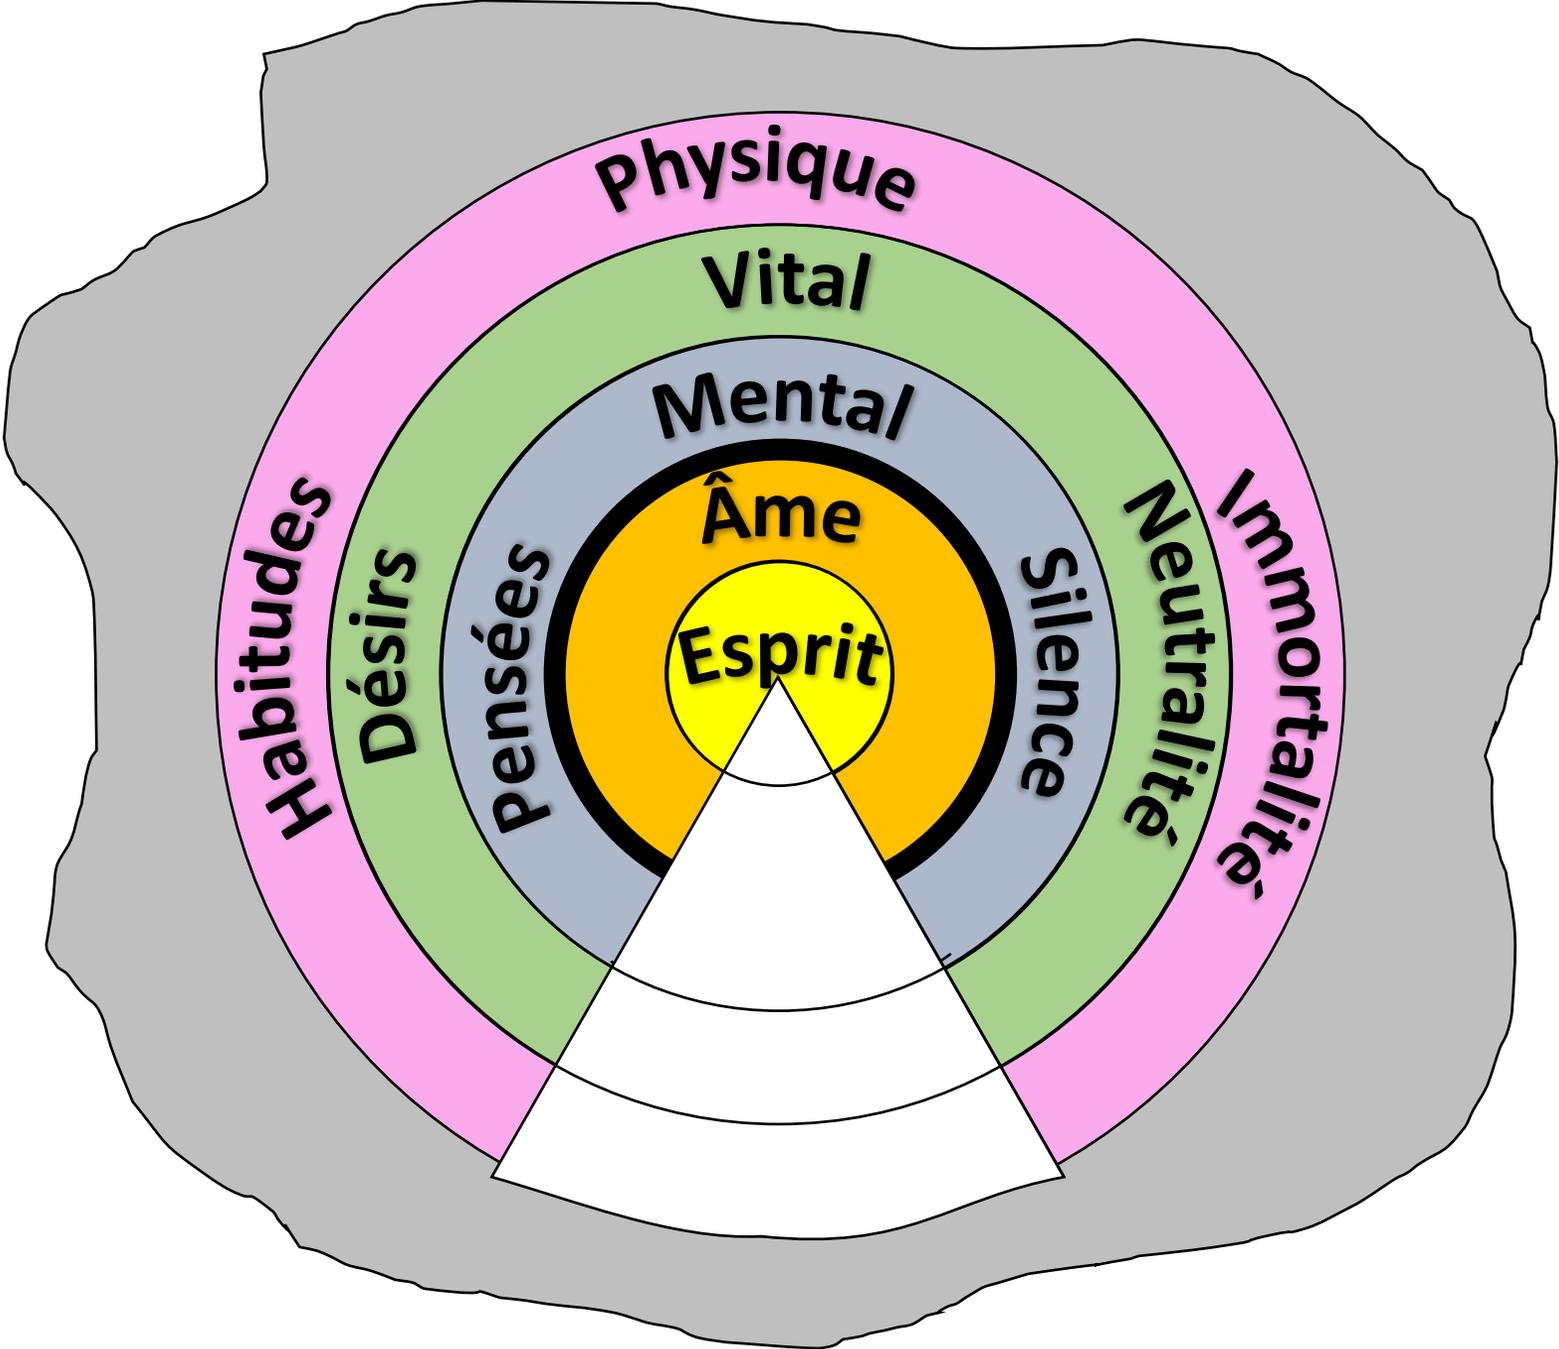

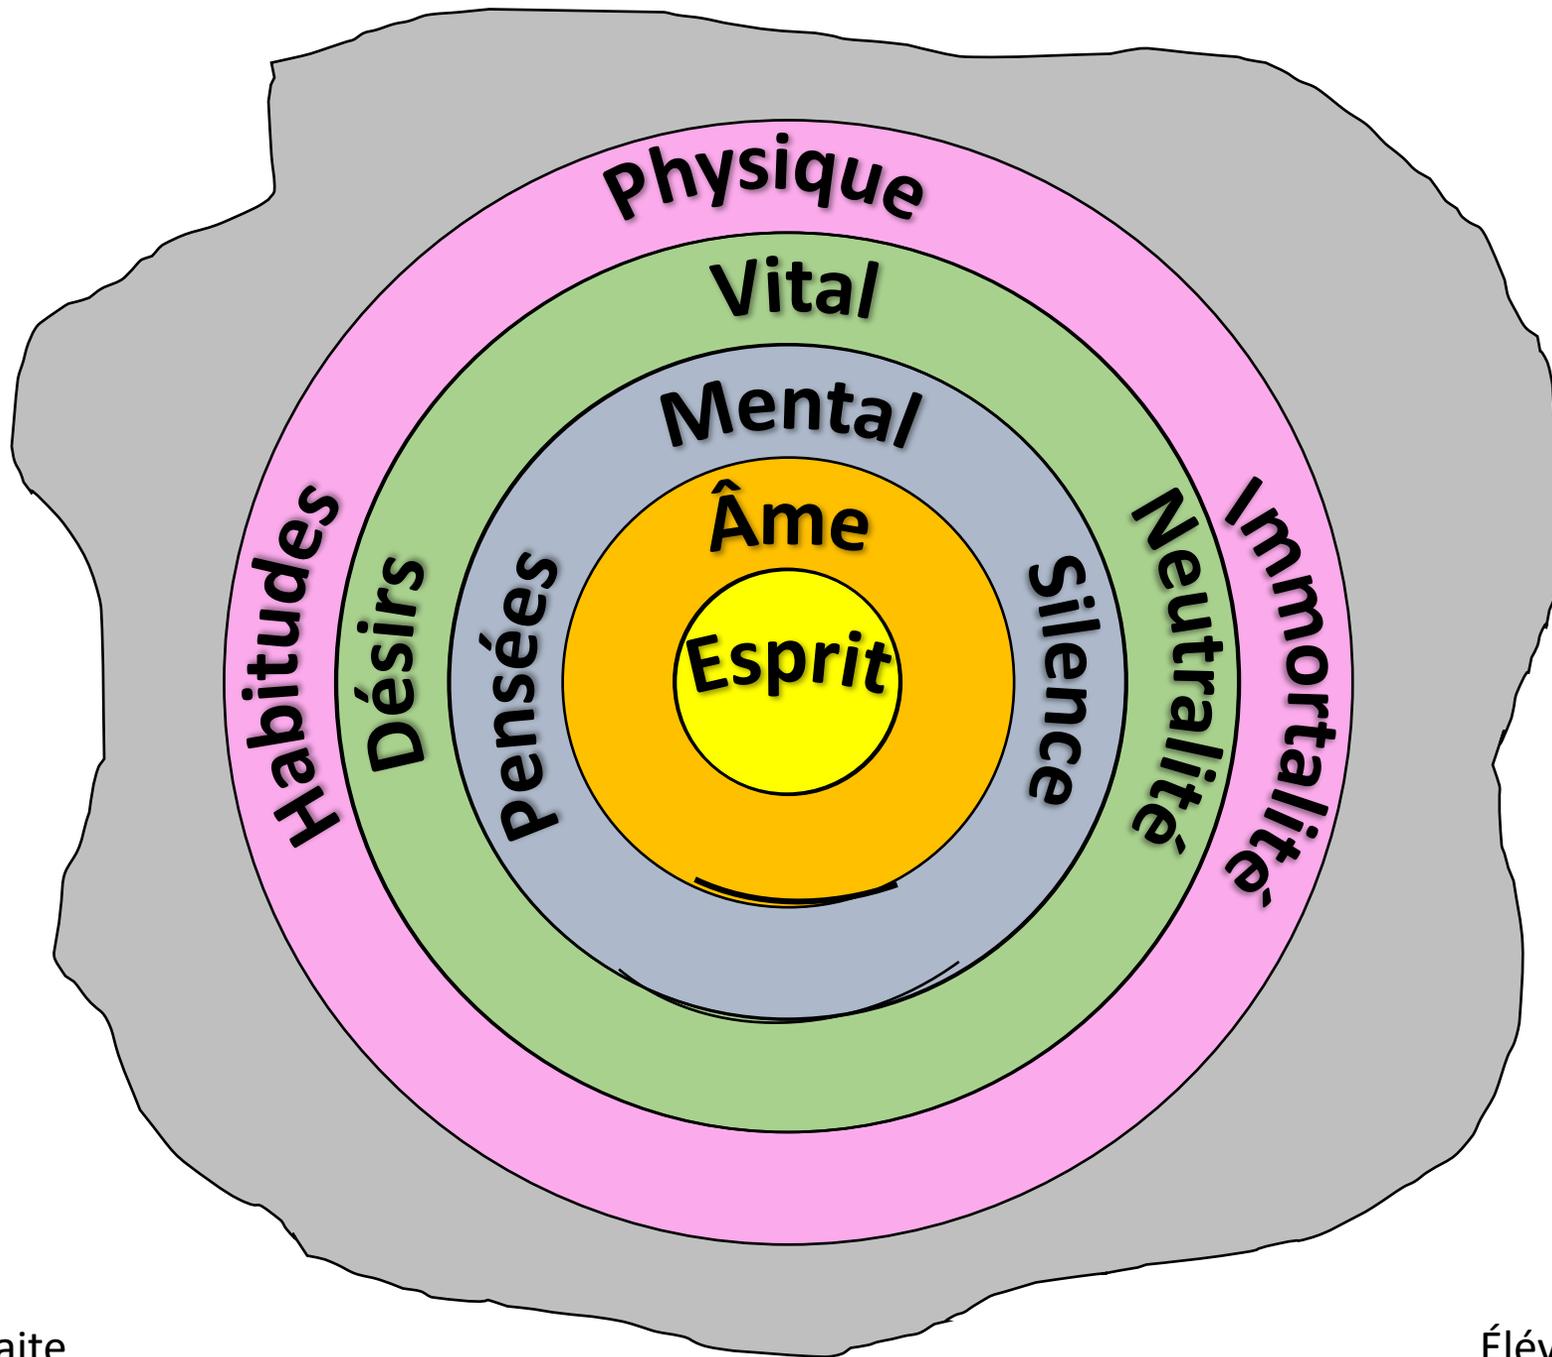

Disharmonie - Santé imparfaite

● Existence virus  
Contagion

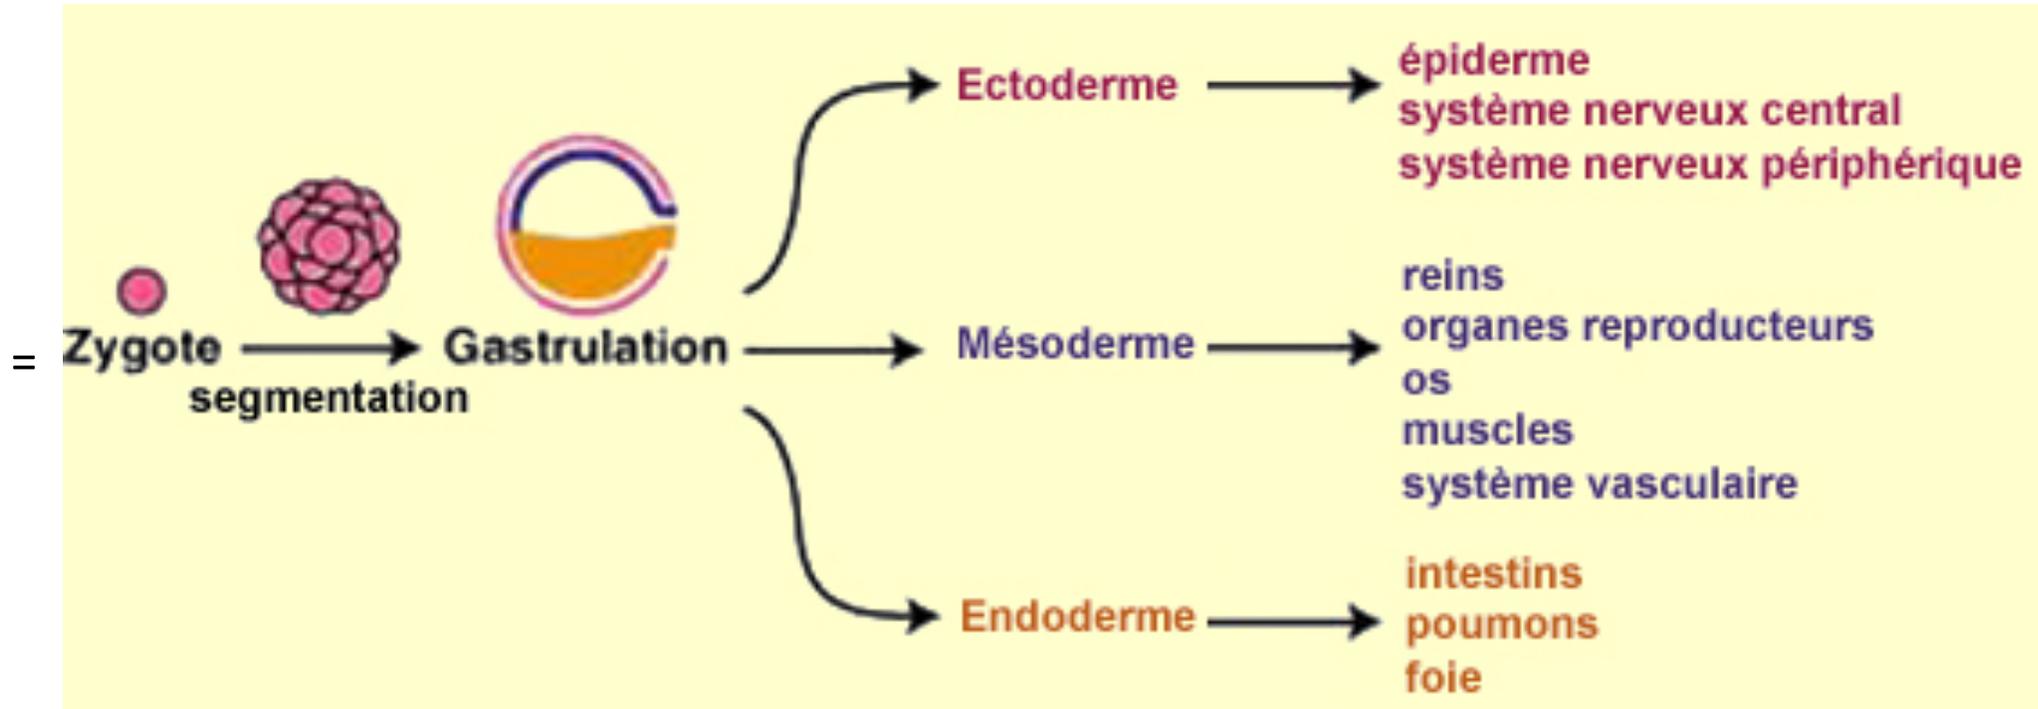

Brielle

Kyrie

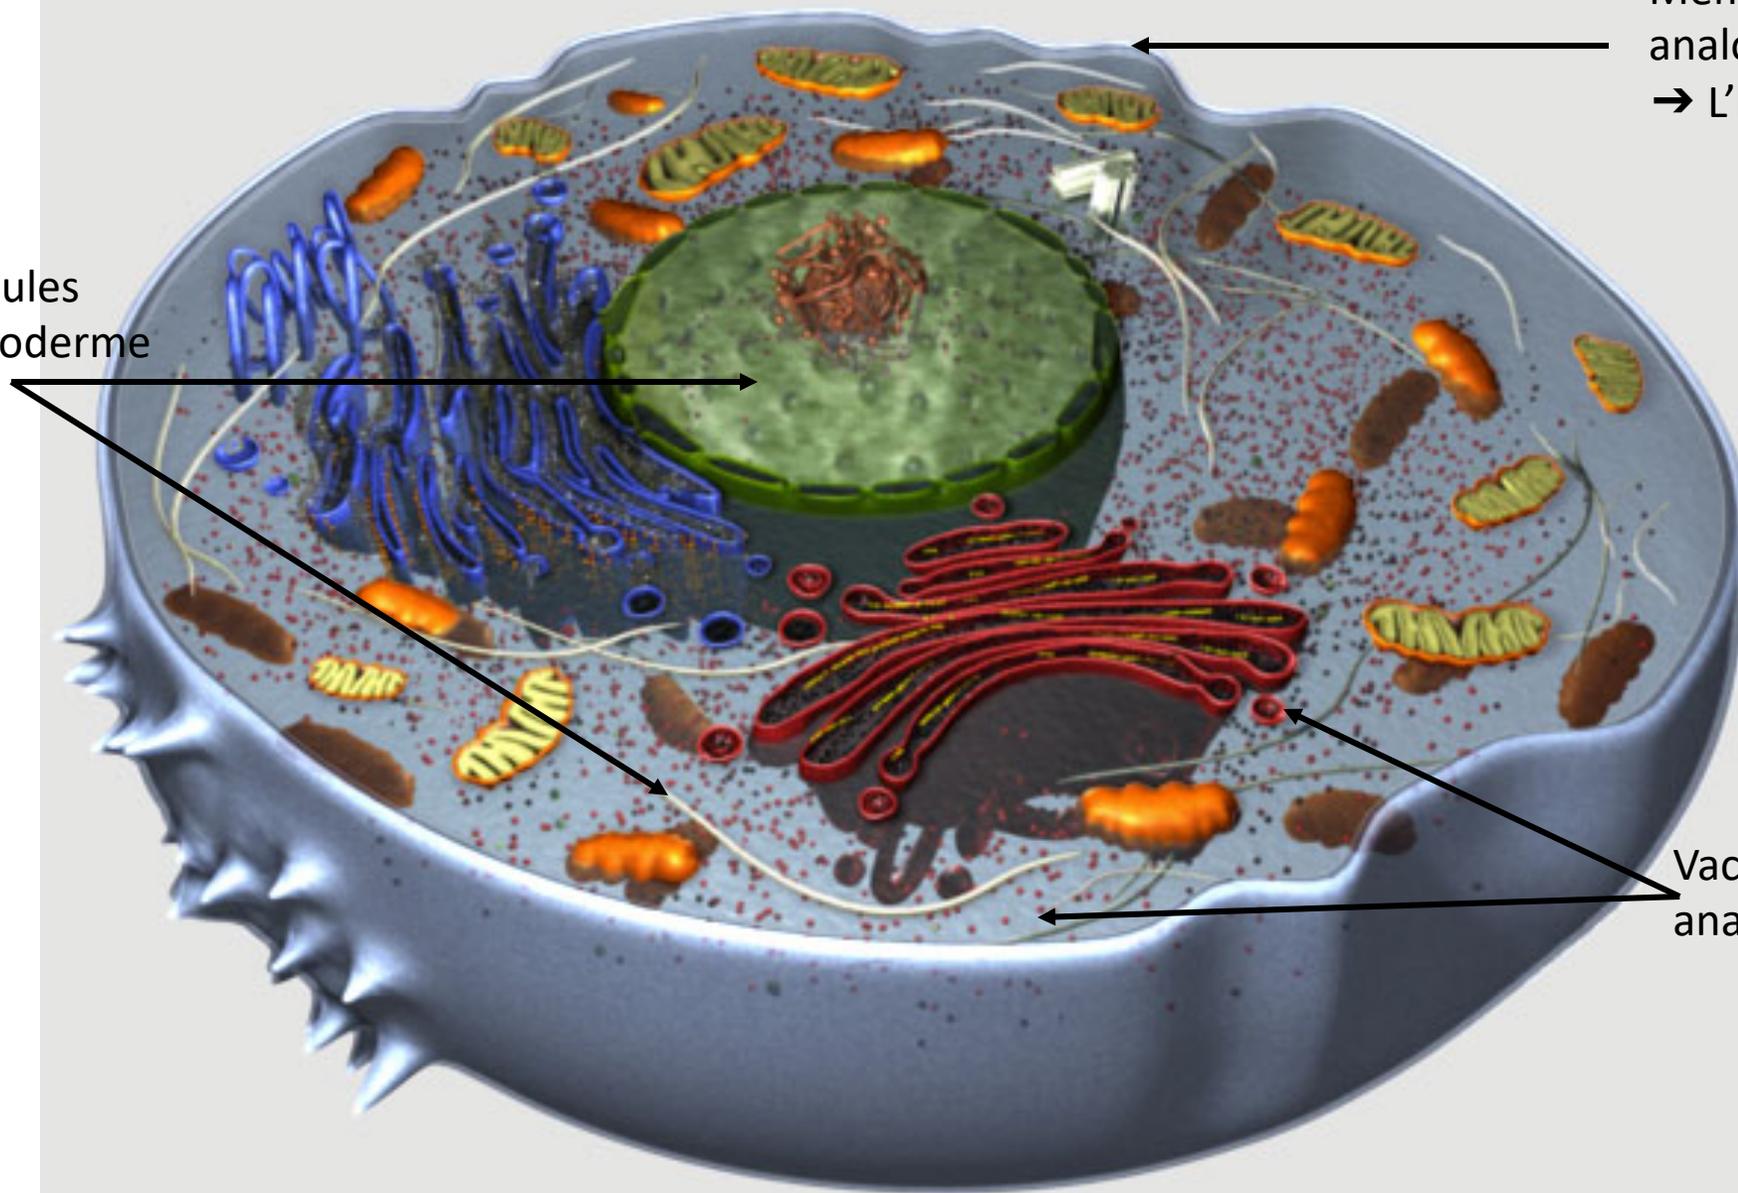

Nées prématurément le 17 octobre 1995 - 12 semaines avant terme.  
Couveuses séparées - éviter le risque d'infections croisées.

Cellule  
oeuf

Division cellulaire = montage & démontage par microzymas → Division harmonieuse  
Ontogénèse des micro-organismes

Noyau & microtubules  
analogues au mésoderme

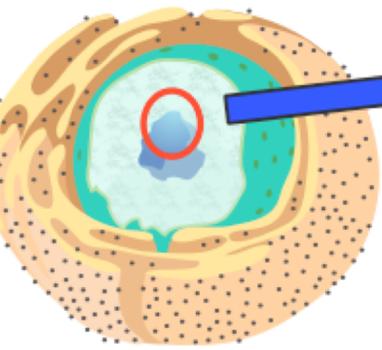

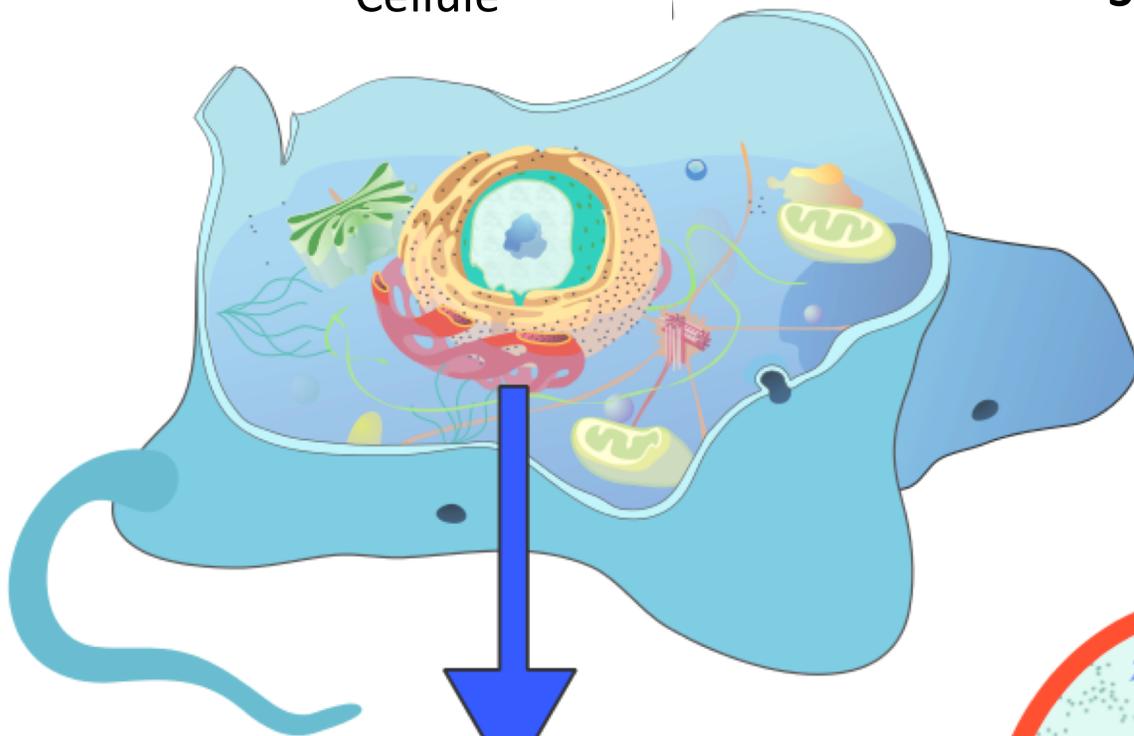

Membrane externe -  
analogue à l'ectoderme  
→ L'homme neuronal

Vacuoles et ribosomes  
analogues à l'endoderme

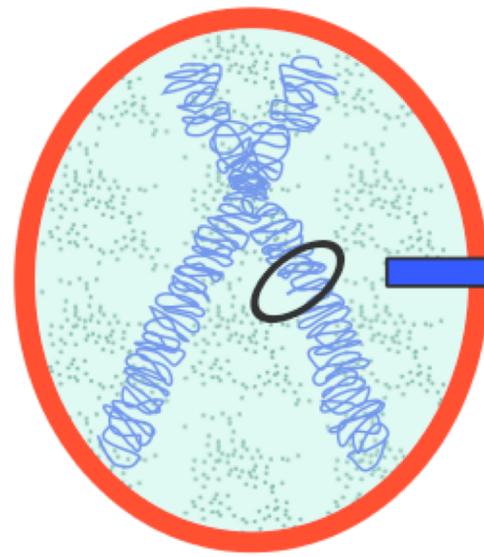

0 2500 nm

Cellule

Noyau

Structure fractale

Chromosome

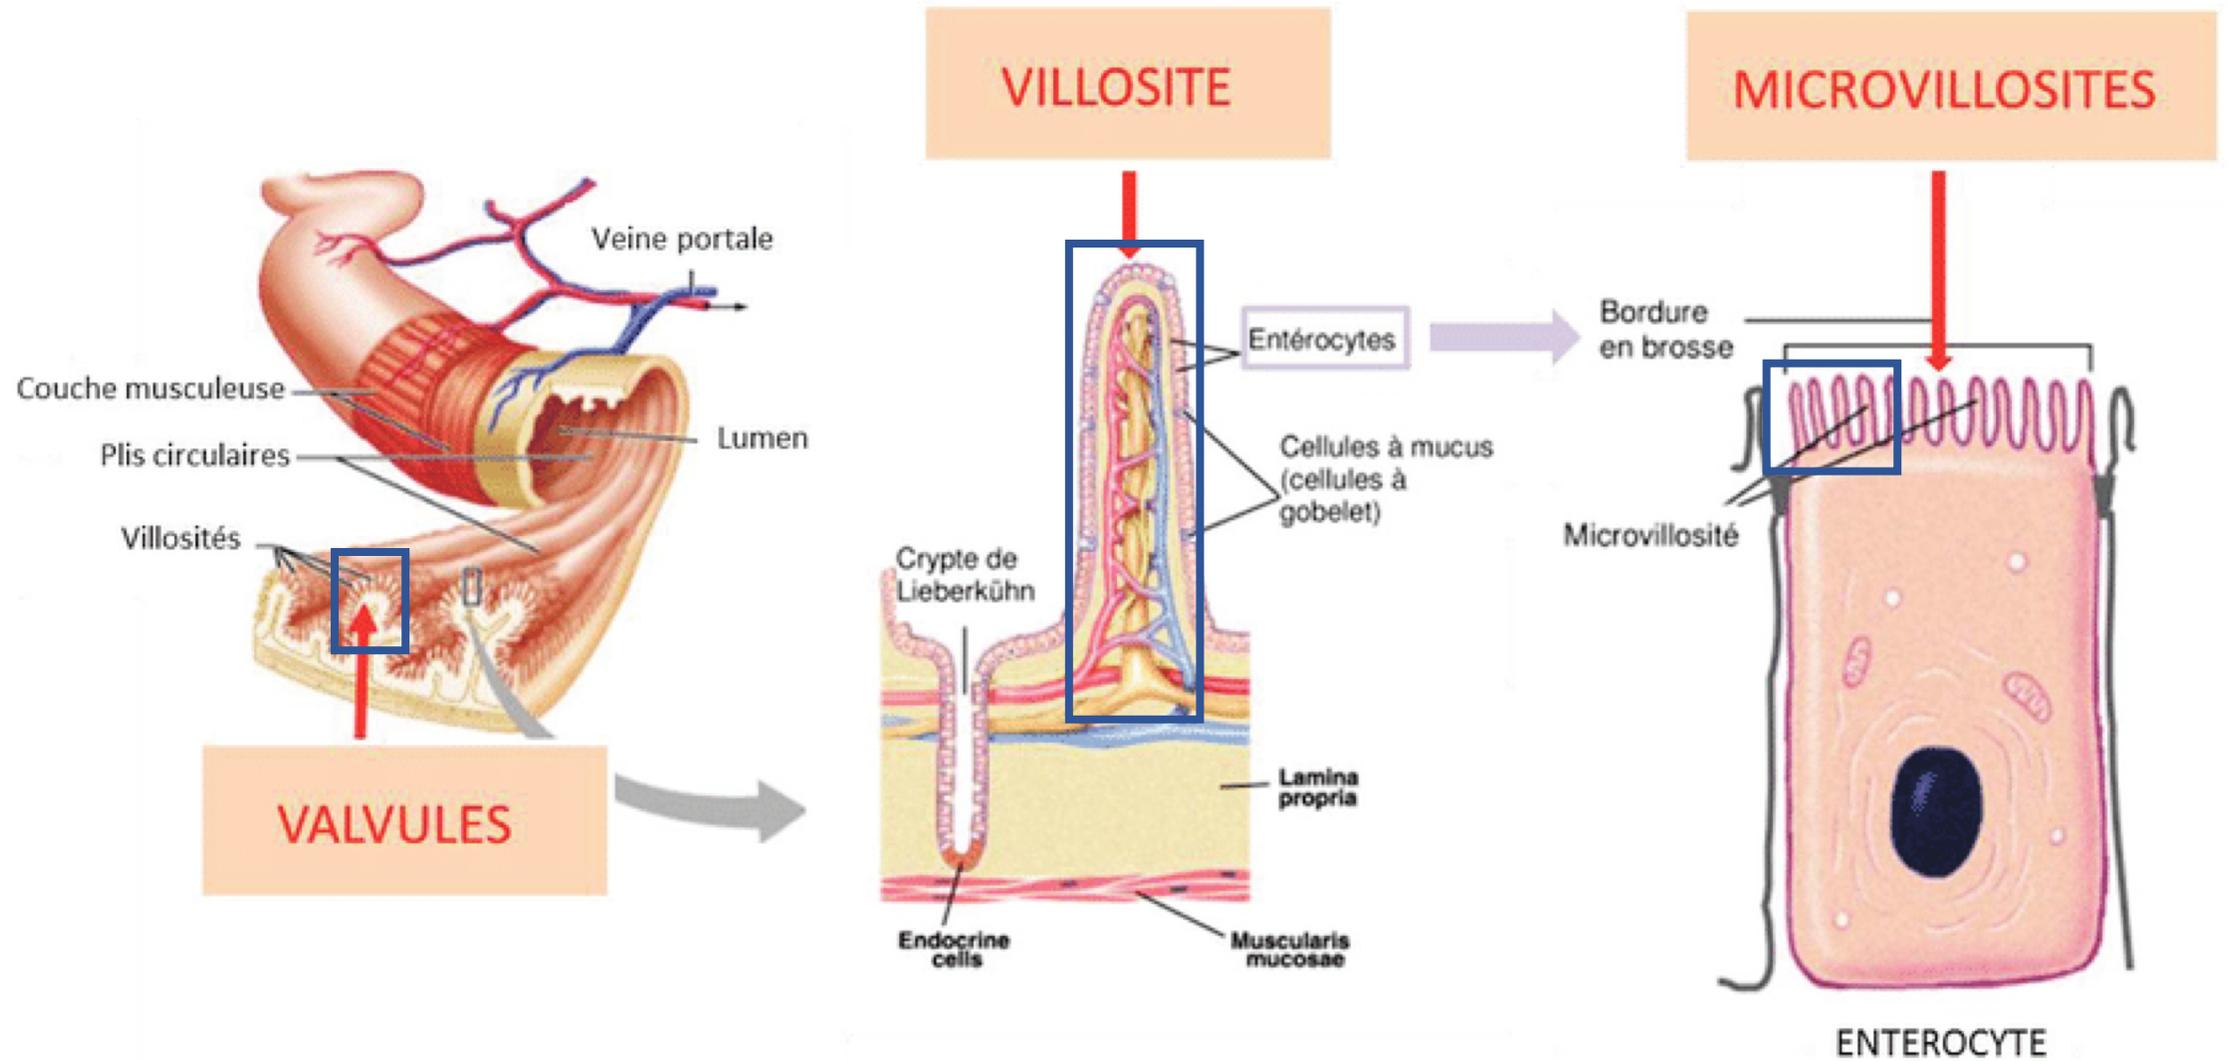

ADN

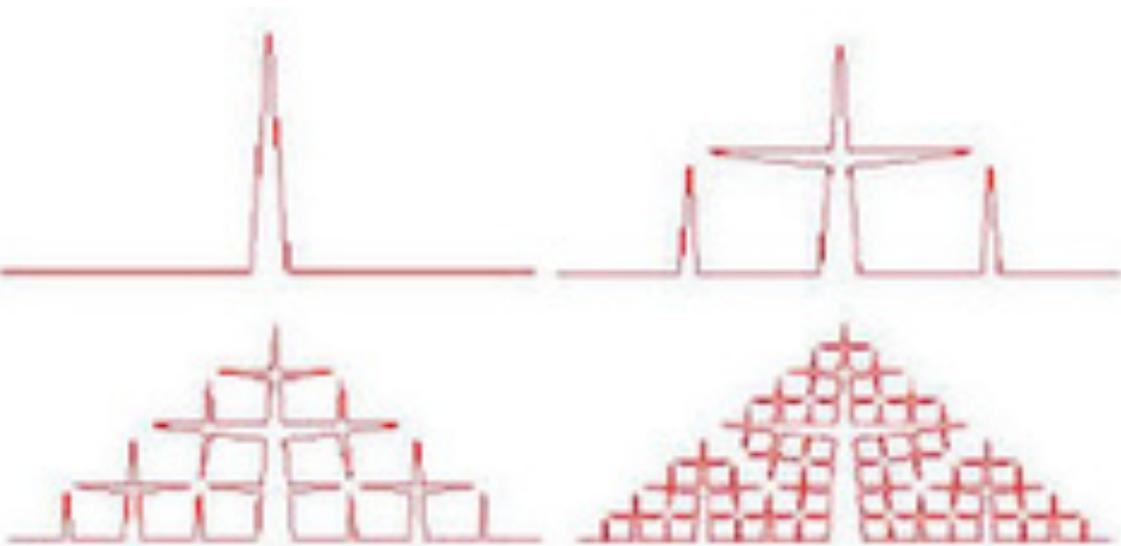

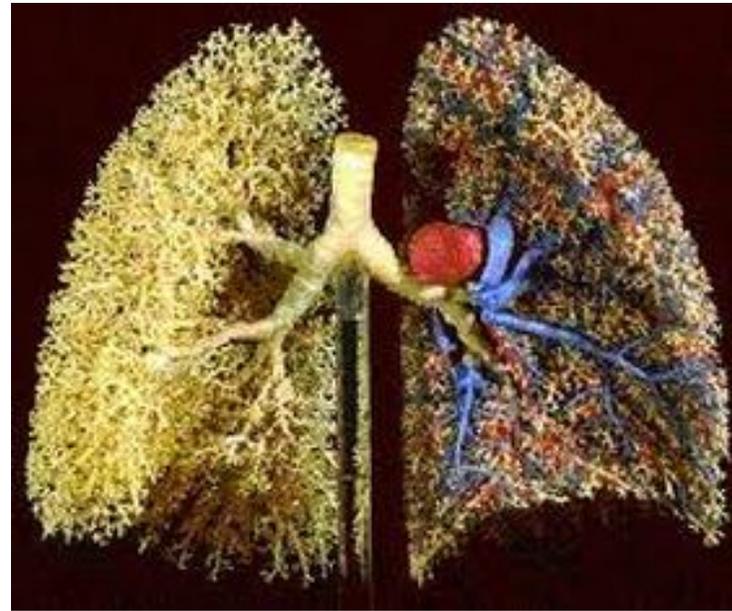

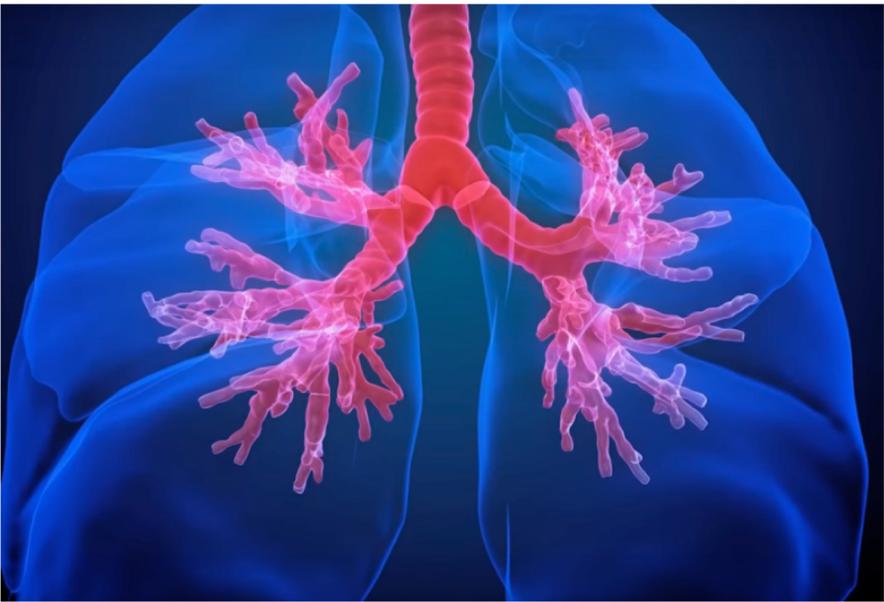

Agrandissement : X 10

Réseau vasculaire = organisation fractale = bifurcations identiques entre elles → bien auto similarité.

Zoom / partie de l'intestin grêle → structure fractale

Création d'alvéoles pulmonaires

Division harmonieuse
